

The Ultimate Choice in Web Based Imaging!

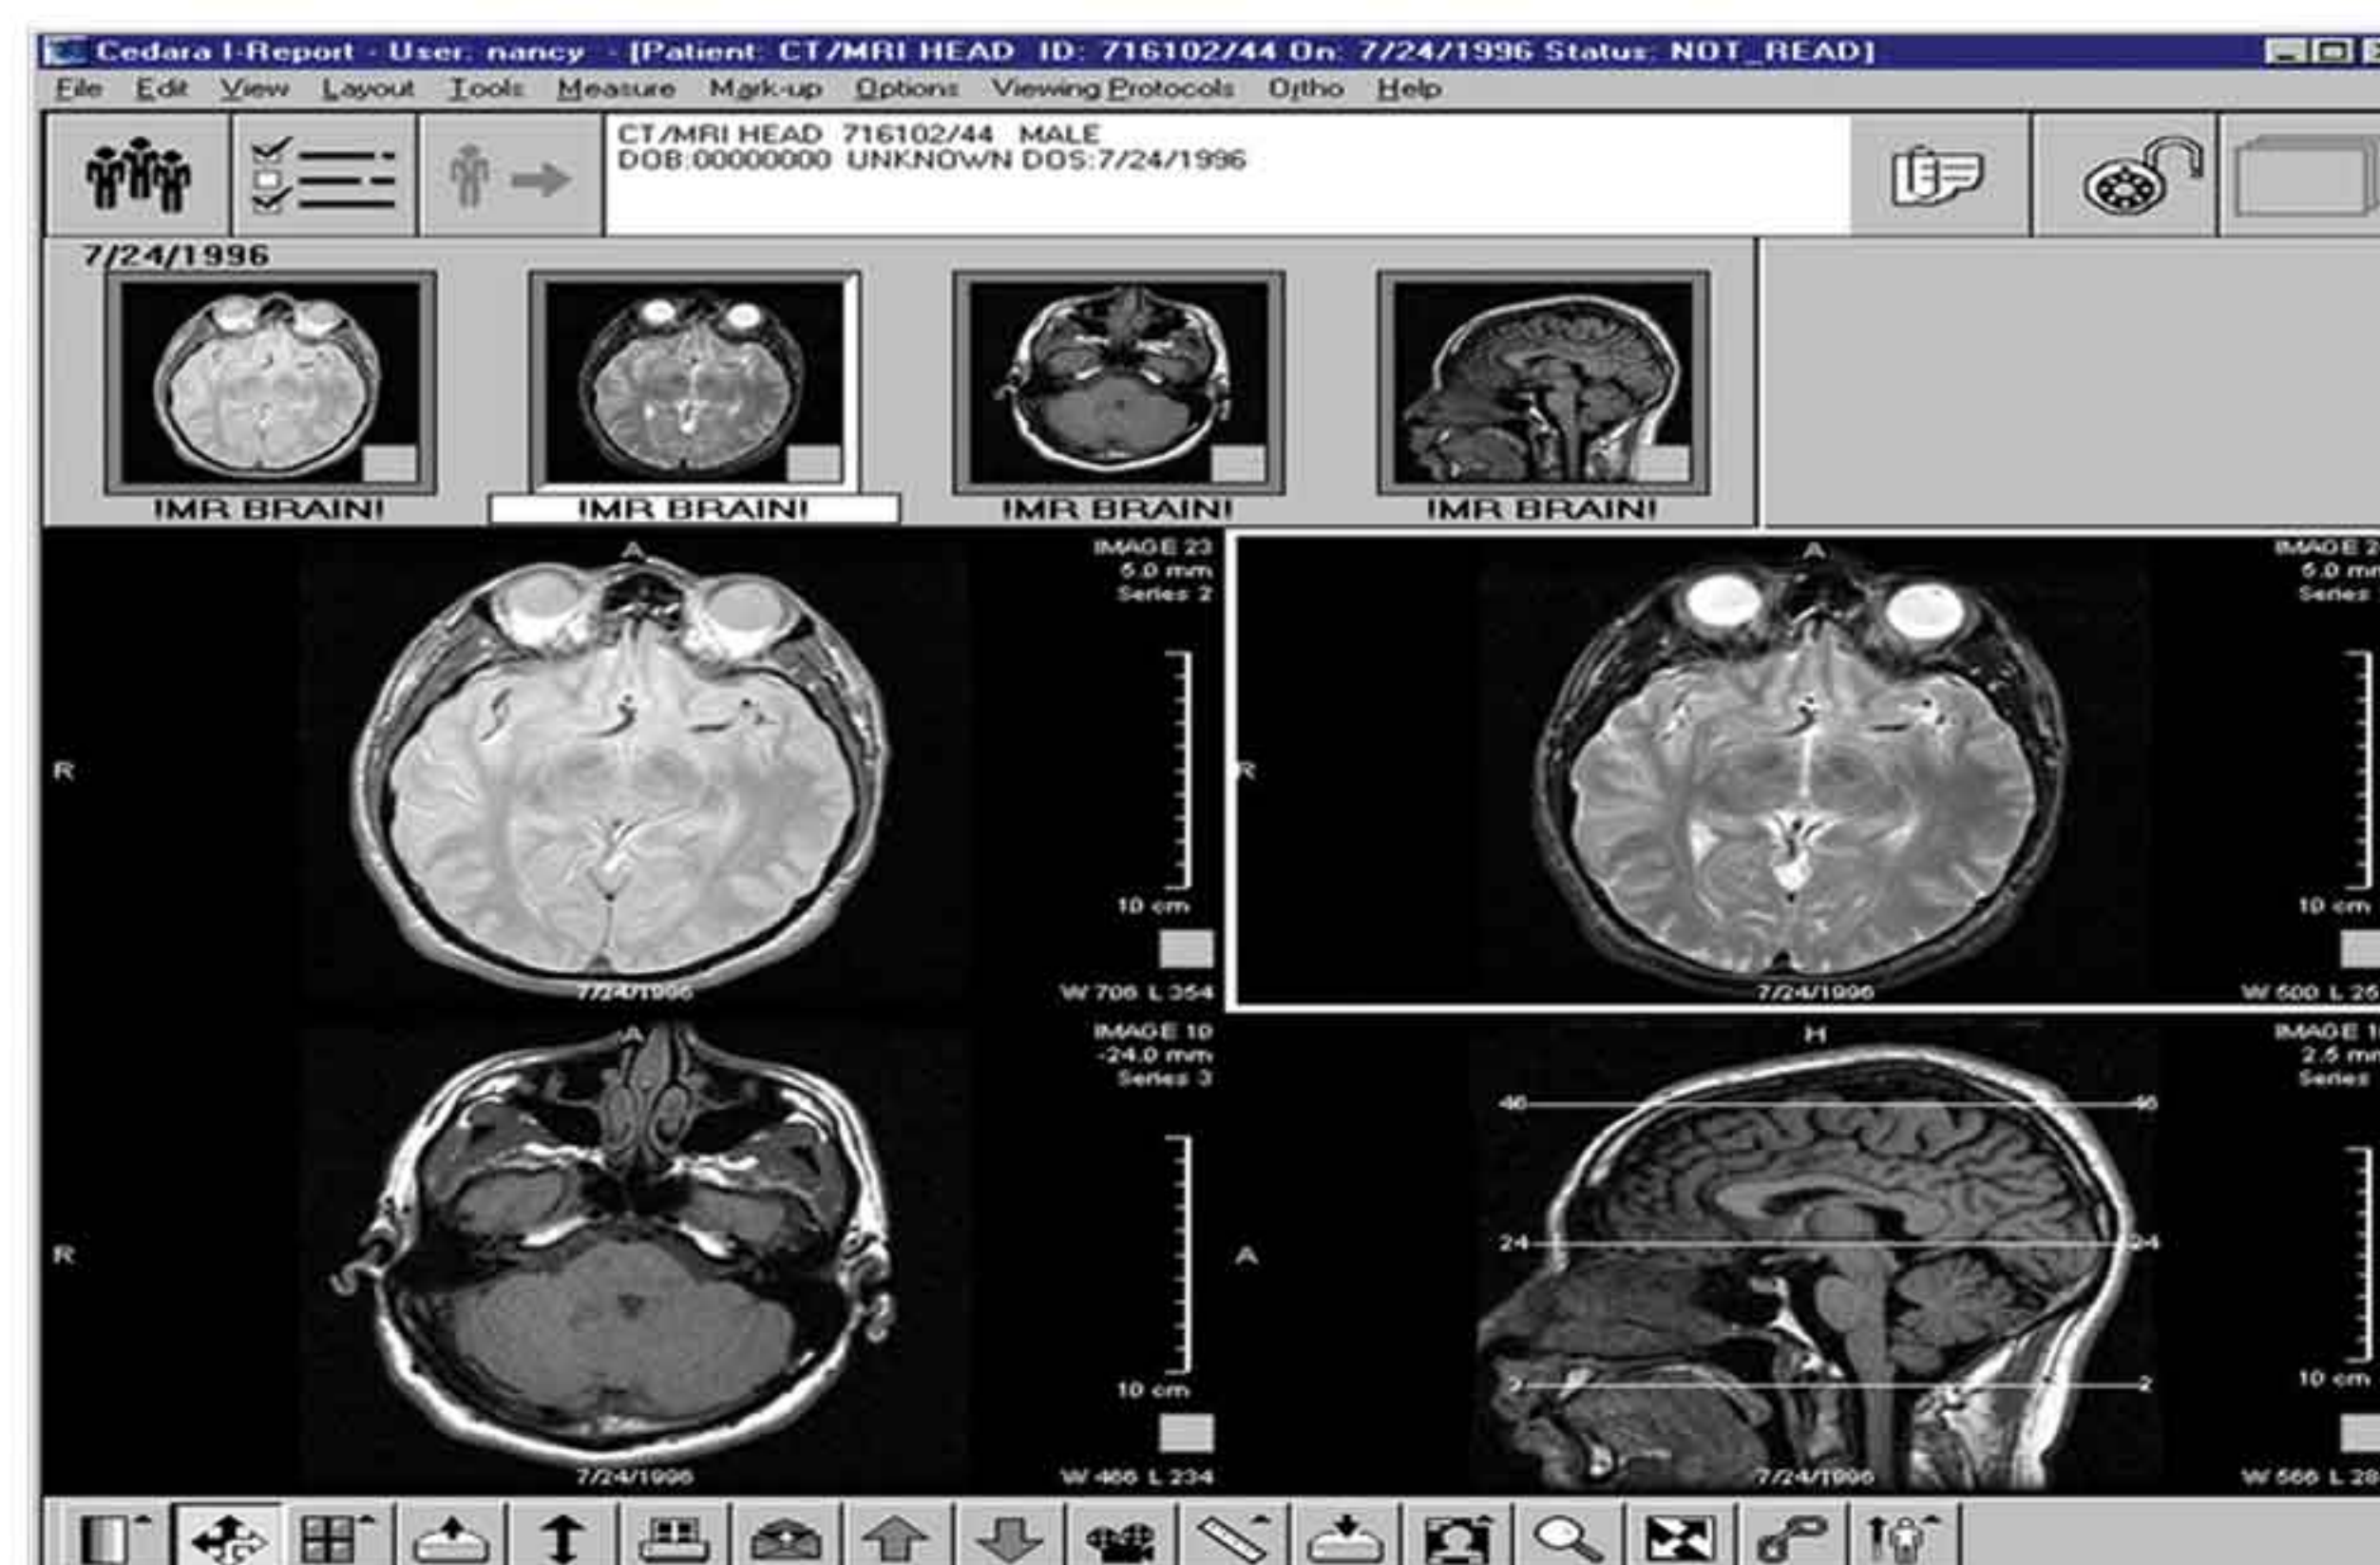

With image distribution moving more and more toward Internet and intranet solutions, UltraRAD has advanced the product line with UltraWEB.

UltraWEB provides a fully scalable solution, from a single user teleradiology application to comprehensive integrated network solutions. Start with a small user base and expand users or functionality as your needs grow. UltraWEB comes standard with Server and Client Software as well as Advanced Viewing Protocols.

UltraWEB utilizes a new streaming compression technology with JPEG2000, enabling your medical professionals to share images instantaneously and transfer lossless or lossy quality over any web connection, regardless of bandwidth. There is no faster way to view images inside or outside your organization than the cost-effective UltraWEB solution.

There is no need to invest in network enhancements or expensive high-end workstations. UltraWEB's standard solution easily integrates with your existing DICOM Modalities/ Archive and viewing is capable on any standard PC running Internet Explorer.

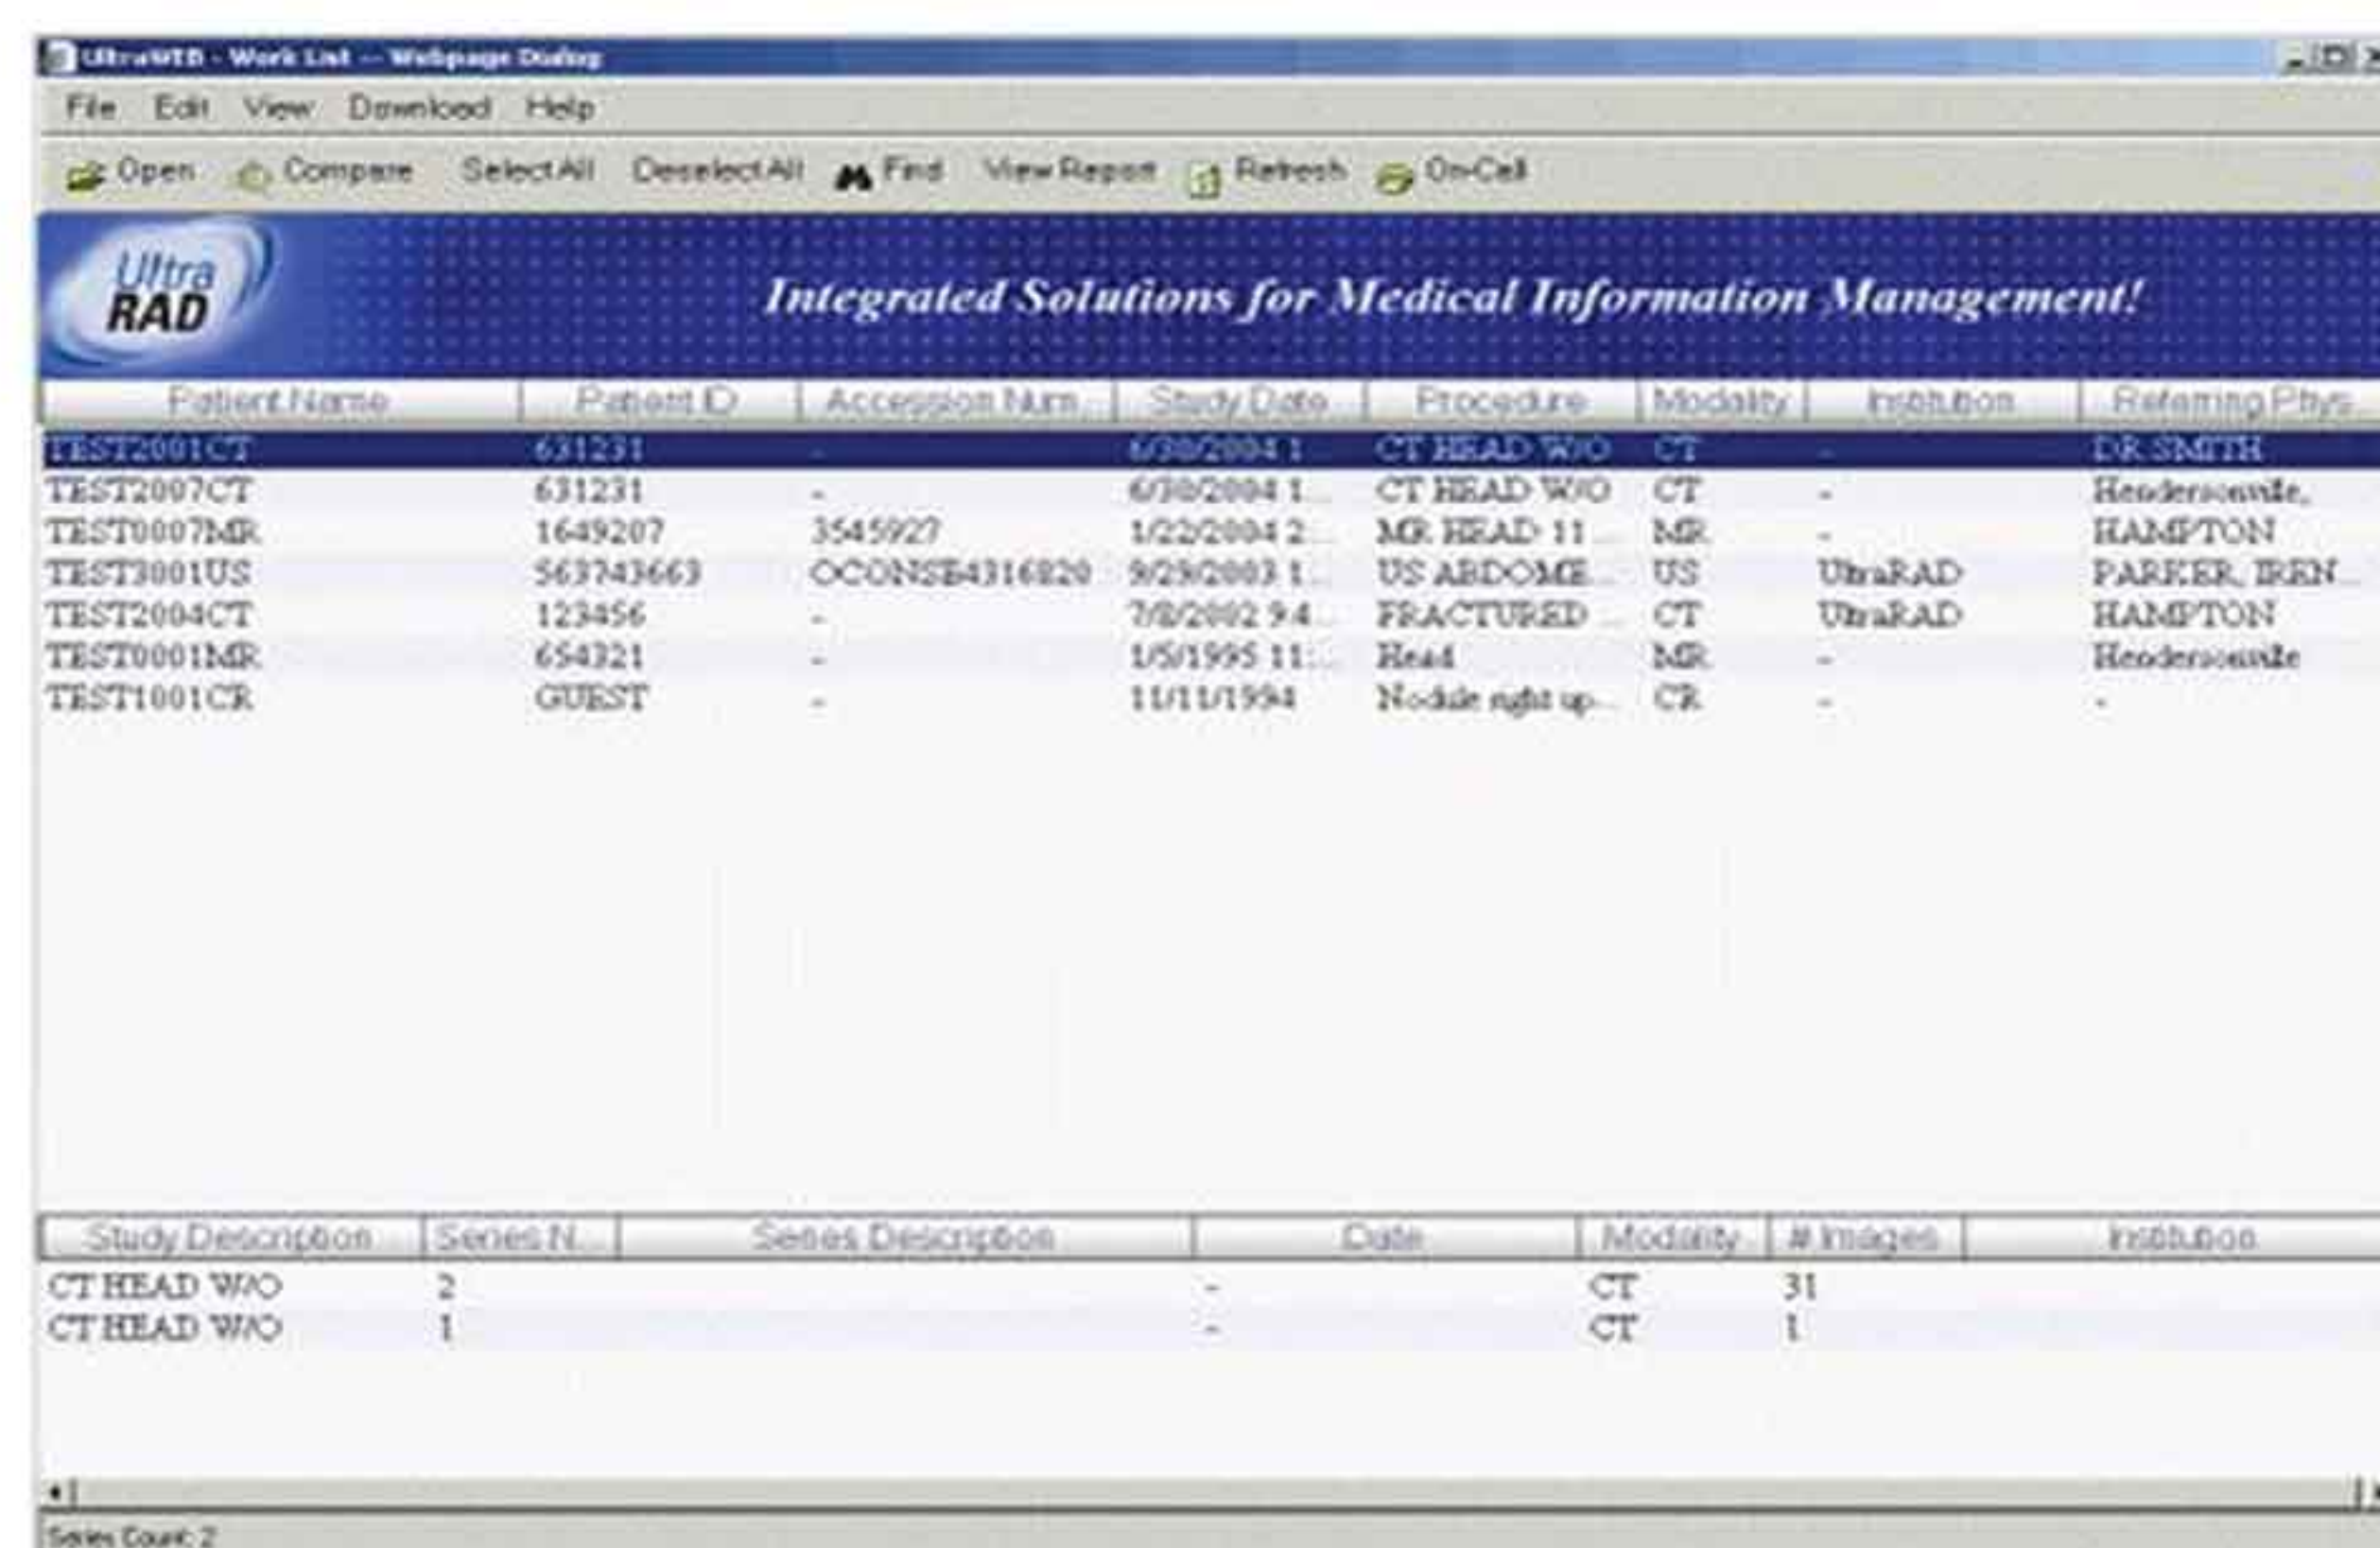

UltraWEB's centralized deployment and user profile management makes simple administration possible. This combined with ease of use and excellent performance makes the UltraWEB Product Line the right choice for any size organization.

Advanced visualization tools and viewing protocols allow for diagnostic reading.

Features:

- *Image access in seconds
- *Easy to Use
- *Secure and HIPAA Compliant
- *Advanced Functionality
- *Cost Effective
- *Integrated Reporting features
- *Centralized deployment and user profile management

Easy to use interface allows maximum controls with minimum effort.

System Requirements:

Component	Minimum Requirement
Processor	Intel Pentium/Celeron family, or AMD K6/Athlon/Duron family, or compatible processor running at 1.6 GHz or higher
Memory	1 gigabyte RAM or more.
Hard drive	2gigabytes of storage
Video Card	Support for 1024x768 resolution at 16-bit color
Network Interface Card	10/100 BaseT Ethernet adapter running TCP/IP Protocol
Other	Microsoft Internet Information Server 5 or later Microsoft SQL Server 2000 or later
Operating System	Microsoft Windows 2000 Professional or Server w/ SP4; or Microsoft Windows XP Professional w/ SP2; or Microsoft Windows Server 2003 w/ SP1
Regional Settings	English (United States)

Optional Features

- *3D Tools
- *Advanced/ Hi-Res Viewing
- *DICOM Print
- *Multi-Monitor Support
- *Orthopedic Tools
- *Reporting Tools

Connectivity Options

UltraWEB is part of the UltraRAD Medical software Imaging suite and will seamlessly connect to any of the following UltraRAD products..

UltraARCHIVE

Robust DICOM archive providing secure long term storage of DICOM studies.

UltraPREFETCH

Automatically retrieve relevant priors and route studies from any PACS system.

UltraBROKER

An HL7 broker solution integrates any HIS/RIS with any PACS or Radiology Imaging System.

UltraSCAN

Patient documentation can be scanned and attached to the relevant imaging study.

UltraGATEWAY

Robust DICOM router providing image distribution, quote management, encryption and image compression.

UltraRAD

Integrated Solutions for Medical Information Management
